PROJECTS

PORTFOLIO

This is my portfolio where I have shown all my personal projects and my work.This portfolio is having a form throught wich they can contact me.
This project is made using ReactJs and CSS.

WEATHER ANALYZER

It is a real-time Weather application that allows users to get weather and temperature from a specific place. It also provides the weather and temperature of neighboring cities and the next six days of Searched place.

ELECTRO STORE

It's an eCommerce Store that allows users to purchase the products with their Debit/Credit card. In this Admin can add, edit, delete the products. In this application Authentication and Authorization are implemented.
